-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 08 December 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

FLOW SENSOR INTEGRATED WITH LEAK DETECTION
FOR PURGE VALVE DIAGNOSTIC

NON-FINAL OFFICE ACTION

In response to the Applicant's amendment dated Dec. 08, 2005.

ELECTION

Claims 15-36 remain withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

DRAWINGS

In view of the Applicant's amendments to the drawings, the objection thereto as set forth in the previous office action (July 08, 2005) has been overcome.

CLAIMS

Double Patenting

In view of the Applicant's arguments, the rejection of claims 1-14 under 35 U.S.C. 101 as claiming the same invention as that of claims 1-14 respectively of copending Application No. 10/758,239 as set forth in the previous office action has been withdrawn.

However, the following now applies:

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-14 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-14 of copending Application No. 10/758,239. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of patent application 10/758,239 set forth each and every limitation of the present claims. The only difference between the lone independent claim of the present application and the corresponding claim of the copending application being that of the additional limitation of “locating a pressure and temperature sensor upstream of a canister” in the copending application. Thus, the claims of the present application are not patentably distinct over the corresponding claims in copending application 10/758,239.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

35 U.S.C. § 102

In view of the Applicant’s arguments, the rejection of claims 1-4 and 9 under 35 U.S.C. 102(b) as being anticipated by Reddy (5,263,462) is overcome and has been withdrawn.

RESPONSE TO ARGUMENTS

The Applicant's arguments with respect to all of the rejections of the claims have been considered and have been found to be persuasive.

CONCLUSION

Since the new grounds of rejection set forth in this office action was not the result of any claim amendment, this action is made non-final.
